SECOND DRAFT TO  
CALL 800,000 MENRegistrants in Deferred Classes  
to Go Into Service—Farmers  
Summoned Last.

## MUSTER LIKELY NEXT MONTH

Selections From Essential Industries  
Will Be Gradual and Far Apart,  
Says Statement Issued by the  
Provost Marshal General.Washington, March 14.—Provost  
Marshal General Crowder made the  
first official announcement of the time  
of the second draft. It will be ordered  
as soon as congress amends the law to  
compute the basis of apportionment  
among the states on the number of  
registrants in class 1 instead of popu-  
lation. For purposes of computation  
800,000 men will be considered as com-  
posing the second draft, although no  
such number will be called to the col-  
ors at any one time.Men in deferred classifications, the  
provost marshal general announced,  
would be called in small numbers as  
well as men in class 1, for the purpose  
of utilizing special technical qualifi-  
cations or sending them to schools to ac-  
quire such qualifications.The provost marshal general makes  
the definite statement, however, that  
there will be no sudden withdrawal of  
great numbers of men from industry  
and agriculture during the coming  
summer, but that they will be drawn  
in relatively small groups spread  
throughout the year. To give the ex-  
act numbers, he says, would be to give  
the enemy military information.

## Call Expected Next Month.

While General Crowder says no that  
in his statement, it has been stated  
previously that supplies and equip-  
ment for the men of the second draft  
would become available in April and,  
as action on the desired legislation is  
expected before that time, the first  
calls are expected soon afterward.The next national quota will be an-  
nounced and apportioned among the  
several states as soon as pending legis-  
lation authorizing a change in the basis  
of computation is enacted by con-  
gress," says the provost marshal gen-  
eral's statement. "The number that  
will be assumed as a basis for compu-  
tation will be 800,000, which is well  
within the authorization of clause 4 of  
section 1 of the selective service act of  
a second increment of 600,000 men, in-  
creased by clause 1 of said section 1  
and by the special and technical troops  
authorized by section 2 of said act. It  
cannot now be announced what the  
total number to be called to the colors  
each month will be, but it may be stated  
that no more men will be called  
than can be properly accommodated  
and promptly assimilated.

Call Farmers Last.

There are difficulties confronting

the nation in the supply of labor ap-  
pertinent to agriculture. Class 1,  
from which new levies are to be with-  
drawn, will contain many more men  
than are at present required for the  
army. It would be a most unscientific  
and fatuous step if the men in class 1  
were called indiscriminately without  
regard to the labor situation in agri-  
culture. Therefore, the local boards  
will be directed to fill their quotas in  
the order of liability of men in class 1,  
as determined by the national draw-  
ing, except that, where it is shown that  
a registrant is completely and assidu-  
ously engaged in the planting, cultiva-  
tion or reaping of a crop, his call to  
the colors shall be deferred to the foot  
of the quota of his board as long as he  
continues to be so engaged.

## Furloughs for Farm Work.

There is now pending before con-  
gress a bill authorizing the secretary  
of war to grant furloughs, with or  
without pay, to men in the army to  
enable them to engage in industrial  
and agricultural pursuits.As to further means to protect agri-  
culture a new regulation has been pro-  
mulgated authorizing agricultural stu-  
dents in their senior year in land  
grant colleges to enlist in the enlist-  
ment reserve corps of the quartermas-  
ter's department provided their class  
standing is such as to place them in  
the upper third of their class.The whole industrial and agricul-  
tural situation is being subjected to a  
very comprehensive study in order  
to discover any means that may be  
taken to protect and augment the  
labor supply appertinent to industry  
and agriculture without precluding  
the prompt and orderly progress of  
our military plans. It is confidently  
believed that great progress can be  
made along this line and that more  
effective measures than any yet de-  
vised can be put into operation to at-  
tain the desired end.It must be emphasized that this is  
a war of mechanics. The need of the  
several armed forces for men highly  
skilled in technical and mechanical  
pursuits is greater than in any former  
war.The provost marshal general has  
already called upon the states for 10-  
000 skilled artisans and, will shortly  
call upon the states for 10,000 young  
men, graduates of grammar schools,  
who will be sent before the first of  
April to various technical and other  
schools throughout the United States  
for a two-months' course of training.  
Regularly thereafter, an increasing  
stream of selected men will be sent  
through educational and other training  
institutions for this purpose.
